FOUND DEAD IN BOX CAR

Laborer Who was Beating His way to Milwaukee Dies Suddenly

Early Wednesday morning, while a Northwestern freight train was taking water at Upton, a little station on the Chicago and State Line railway west of Lake Bluff, a man believed to be Frank Blaine or Frank Blaine of Chicago, a wanderer on his way to Milwaukee, died under mysterious circumstances.

John Keler, Richard Thompson and John McCabe, all beating their way, who were with Blaine and got on the train with him at Mayfair, say that he simply threw a sort of fit which lasted a minute or so, and died before they could summon aid. McCabe ran for water and Thompson shouted to the end brakeman that a dead man had been found in the car, but Blaine was dead before water reached him or aid could be summoned. He gave no information further than that he was on his way to Milwaukee. He was a laborer.

The three wanderers with the dead man were taken to Waukegan by the train crew and placed under arrest as coroner's witnesses by Assistant Chief of Police Hicks and Officer Tryon. Blaine lay on the floor of the car dead, stretched out like a victim of heart disease.

LIST OF JURORS FOR THE SPECIAL JANUARY SESSION

Below is the list of jurors called for the special term of Circuit court which convenes January 4:

Denton—Mike Shelly, Henry Meyer, Frank Burke, Newport—William N. Lewin, Antioch—William H. Hacker, R. L. Straug, Grant—Joseph McNeil, John O'Boyle, George Maypole, Avon—Thomas Strong, Waukegan—William Bangs, Axel Lybeck, C. W. Selez, Anton Dudek, Josef McLaren, Harry Dietz, Henry Dow, C. G. Ingraham, Shields—Robert Fairburn, Clarence Baker, A. J. Long, Giles Hlaco, Libertyville—Claude Dressen, Fremont—Frank Knigge, William Vickery, Waukegan—Plutty Houghton, Charles Parker, Elia—Herman Heller, Charles Goss, Vernon—George B. Zimmer, G. J. Horcher, George B. Umbdenstock, Deerfield—Daniel Pease, S. Roebing, P. Gillett.

WOMAN WANDERS AWAY

Somewhere in Lake County, probably near Libertyville, a demented woman has either perished from exposure or is wandering without food or shelter. Whence she came or who she is, is not known, but she was last seen in Libertyville and although search has been made, she is still missing.

The woman got on a Chicago, Milwaukee and St. Paul train at Western Avenue, Chicago, Saturday. She had no ticket but wandered into the parlor car. The conductor noticing her condition, took care of her and at Libertyville took her from the train while he telegraphed to the Chicago authorities.

While surrounded by a crowd on the depot platform, the woman made a dash for liberty. Breaking through the crowd she cut across the field toward Butler Lake. She was pursued by her followers lost sight of her and nothing has been heard from her since nor by any information regarding her identity been received. She was a tall slender woman about forty or forty-five years of age, dark complexioned. A heavy shawl she wore about her head almost hid her features. She carried a bundle under her arm.

Either she is now wandering in the county alone and with food or shelter, or else she has perished. The prevalent opinion at Libertyville toward her death.

THE MAP TO HAVE NEW POT SOON

The village of Rockeford, that's the way it is seen to be, deems the residents of the thriving little community who have engaged Attorney B. H. Mar to handle the matter for them.

The leaders in the movement have circulated a petition and have secured a sufficient number of names for a calling of a special election and the plan will be presented to County Judge John A. Short, asking for a special election to decide the question.

Leaders claim there is no out of the matter being carried and the incorporation of Rockeford as a village.

Generally, The man who thinks he is of the obnoxious few generally turns out to be one of the disappointed men.

FARMERS' MEETING AT GRAYSLAKE

Organize With 196 Members and Raise a Fund of \$98 for Expenses

TO ORGANIZE THE STATE

Extension of Time Cannot be Granted by Dr. Evans From Jan. 1st, and all Cows Must be Tested by that Time

A rumor has been current among the farmers in this vicinity for the past two weeks to the effect that an extension of one month had been granted on the time when all cows should be tested, by the council of the city of Chicago, and it has also been reported that the milk agent on the Wisconsin Central road had said at the meeting held at Grayslake, Monday, that Dr. Evans of the Chicago Board of Health had granted this extension.

However, when the News called up Dr. Evans on the phone, Wednesday it was found that he was out of the city, but his assistant informed us that he had not made any extension of the time, and furthermore, it would not be within his power as an executive officer to grant such an extension without an order from the city council in session.

Therefore, it behooves every farmer who wishes to ship his milk to have his cows tested as soon as possible.

About four hundred farmers met at Grayslake Monday and perfected an organization for protection against the recent orders of the Chicago health department concerning tuberculin tests among dairy herds that supply Chicago with milk.

Meetings were appointed for Libertyville on Saturday, Jan. 2; Round Lake, Monday, Jan. 4, and Lake Villa, Wednesday, Jan. 6.

The matter was discussed and it was evident that there is a sharp division of the farmers, some being in favor of the "pure milk at any cost" program, while others are at the other extreme.

The resolution committee appointed at the Antioch meeting reported a set of resolutions, and after much discussion the report of the committee was accepted. A permanent organization of shippers on the Wisconsin Central was effected with a membership of 196, and collection of \$93 was taken up.

An executive committee was appointed with power to transact all business, such as the taking of names and membership fees, which was placed at 50 cents, to any one wishing to join the organization. The committee is also empowered to visit other sections of the state and perfect other organizations. The committee appointed are: J. F. Martin, Antioch; J. Barnstable, Lake Villa; E. R. Moore, Grayslake; E. Wilcox, Rockeford, and O. G. Small, Prairie View.

The general opinion seemed to be that the matter should be made the subject of a state law compensating the farmers for any cows lost through the inspection.

BARRINGTON LAD BITTEN BY VICIOUS DOG

Herman Sandman, fifteen years of age, son of Fred Sandman, of Barrington, was bitten by his pet dog Wednesday of last week. The dog had been kept in the basement. Herman went into the basement for some wood and the dog jumped at him, biting him in the leg. Mrs. Sandman applied ammonia to the wound with a cloth, and thoughtlessly used the same cloth to bathe a scratch she had received on her arm by a fall.

No attention was given to the incident until after the dog died Monday night. George Froelich took the head of the dog to Chicago Tuesday and an examination revealed the fact that the dog had been suffering with hydrophobia. Mrs. Sandman and son are taking treatment at the Pasteur institute, Chicago.

Revealing Ancient History.

In Laconia, Greece, where excavations are being carried on vigorously by English archaeologists, the latest finds confirm many assertions by ancient authors concerning the Spartans. It becomes definitely known that Laconia was formed by the union of five villages; that only priestesses and citizens fallen in battle were buried; that children were bribed in public; etc. But the most fortunate discovery is that of the most ancient Doric temple known. It dates from 600 B. C. It is built partly of wood and partly of sun-baked bricks.

GOURLEY COUNTY PHYSICIAN

Offer Bid of \$2,000 for 6 Months for Salary and Expenses

KALOWSKY'S NEXT LOWEST

Doctor and Hospital Bills Last Year Were \$13,000, Which Means a Saving of \$9,000 to Start With

At the special session of the Lake County Board of Supervisors held Monday morning to enter into contract with a county physician, Dr. J. Gourley was retained to care for the county poor, his duties to include furnishing of medicines, drugs, bandages and in fact cover every expense to the county, including all hospital expenses. His bid was \$2,000 for the six months covered by his contract or at the rate of \$1,000 per year.

Others bidding were Dr. Brown \$15.00; Foley and Bellows for the town of Waukegan, \$15.00; and Benton City \$250; Dr. Daniels, \$985 annually; M. J. Kalowsky, \$2200 for six months. The question arose as to whether the doctors all understood they were to pay all hospital expenses when they submitted their bids. Dr. Brown was on hand in person and explained he did not. Dr. Daniels telephoned he did not. Dr. Gourley telephoned he did not. For some reason Dr. Kalowsky was not communicated with and there is no little comment on the account. However, his bid was higher than Gourley's and it may be that was the reason.

Then Dr. Gourley was again reached over the phone and said he fully understood he was to pay all expenses, including hospital bills. He was awarded the contract.

The doctor and hospital bills last year amounted to \$13,000. Dr. Gourley will do the same work for \$4,000 per year, a saving of \$9,000 to the county each year. The supervisors feel the innovation is all that can be expected at least from the economical viewpoint.

COUPLE NARROWLY ESCAPE DEATH

Crossing the tracks in a buggy at the St. Paul railroad crossing between Taylor Grove and Rosecrans, the minister of the Rosecrans church and a young lady with him had the unique and dangerous experience of having their horse catch his hoof between the trackage and the crossing plank while a fast train bore down upon them around a short curve at the Taylor Grove crossing.

Both dismounted from the buggy and got out of danger's way, expecting to see the horse reduced to chopney and the wagon to match wood. However just as the train reached him, the horse managed to disengage himself and started forward so that the buggy alone was hit and ruined.

Rev. Dietz was the minister and Miss Elsie Brewer the young woman who rode with him.

FIND HOG FREAK IN SALEM

The town of Salem, Wisconsin, is making a bid for fame as a place for the raising of circus freaks. The latest discovery in Salem is a mule-footed hog.

The animal is the size of an ordinary hog and is similar in every detail to the hog with the exception of the hoof which, instead of being of the character generally seen on a snouted animal it is hard and firm like that of a mule.

The animal works well, being used at Salem in the J. C. Tewee ice house at work on the tread-power which would be out of the question for a hog to do and which would be impossible for a bulky mule. The mule-hog is a happy medium. It is small and can be driven. It has hard hoofs and keeps close to the ground. The ice company is satisfied that this new find supplies a long felt want and that people will take delight in this discovery of the breed.

Real Love as a Boon.

Love temporarily obscures the glaze of vanity. To be accurate, it takes the quicksilver of the back and turns it into a window pane through which we are able to see far beyond the personal reflection to which it was once dedicated exclusively. Therefore, any real love, since it widens the horizon line of the lover, is an infinite boon, whether he wins or loses the object of his heart.

BEATS MOTHER WITH AX

Henry Thomas 50 Years Old, While Intoxicated, Commits Deed

Margaret Thomas, 83 years old, did not wish to see "her boys" quarrel. She interfered, when they engaged in a fight Thursday night and begged them to become friends on Christmas eve.

Then in a frenzy one of them, Henry, 50 years old, turned upon his aged mother and with an ax beat her to the floor of their residence in Forest Avenue, Winnetka.

Mrs. Thomas skull was crushed and she suffered other injuries from which the physicians at Evanston hospital say she cannot recover.

The brother, Frank Thomas, 45 years old, was struck on the head with the blunt end of the ax, but not seriously injured.

Henry Thomas was arrested by the village marshal Harry M. Madison, and locked up in the local police station.

At the hearing before Justice of the Peace J. Madison, the prisoner was held to the grand jury in bonds of \$2,500 on a charge of assault with a deadly weapon with intent to kill.

Crazed with drink, Henry came from his work at Kenilworth in a quarrelsome mood. Frank, coming in later, remonstrated with his brother. The talk led to a violent quarrel, and the drunken man seized an ax and swung it at his brother, striking him on the head and inflicting painful injuries.

Then it was that the aged mother attempted to restore peace, and in a frenzy her son struck at her, cutting deep gashes in her head and breaking three fingers on the left hand when she beelied tried to protect herself from the murderous assault.

The neighbors who were alarmed by her cries sent in a call for help. The village marshal hurried to the scene and found Henry somewhat sobered and gazing in a stupefied manner at his mother's body. He quickly submitted to arrest.

At Kenilworth, where Henry Thomas worked in the village parks and as a gardener for some of the families, he bore an excellent reputation.

TELEPHONE DRIVER GETS LEGACY FROM ENGLAND

Friends of "Jack" Hucker, well known driver for the Chicago Telephone company of Waukegan, assert that they have seen a letter from English solicitors to the effect that the Waukeganite has inherited 2000 pounds English money, from a bachelor uncle who died in Somersetshire, England, some weeks ago.

This, at the valuation of a pound in American money, \$4.86, would net the Waukegan man \$9,720.

The letter is said to have conveyed the information that the uncle left 2000 pounds sterling to each of Hucker's brothers and sisters, there being five boys and two girls in the family.

One brother and his wife and child are expected to reach New York this week to make their future home in America.

Mr. Hucker, the man who benefits by the legacy, came to this country about twenty seven years ago, and for a time had a place at Gage's corner, going into Waukegan to make his home ten or fifteen years ago. Mr. Hucker is a modest, hard working, faithful Englishman whom the large bequest in no wise disturbs. The management at the telephone company did not even know that he had been made the recipient of the legacy and he could not be located for an interview as he was at North Chicago with a crew of linemen, whose apparatus he handles on a special wagon. He has been engaged in this for years and is a valued employee.

The cash is expected to arrive next week, according to Mr. Hucker's friend. There is a large inheritance tax to come out of it, the English law making the tax proportionate to the relationship of heirs to the deceased.

GRIM DEATH CLAIMS THREE POSTMASTERS

Within three weeks three men who held the office of postmaster of the village of Bristol, Wis. for a total of nearly fifty years have died. John A. Roberts, the first postmaster of the village died in St. Paul; James Shumway, postmaster for eighteen years died in Bristol on Wednesday, and Sunday night William Turner, who has been in charge of the office for twenty years, died suddenly. Congressman Cooper is expected to recommend a successor at once and the people of Bristol are asking for the appointment of Turner's widow.

Outgrowing Things.

Yes, we outgrow everything—toys, little pink or blue dresses, friendships, loves, and ideals, and it is well that we do, says a writer in Home Notes. We may occasionally regret some one of them; but if they were always ours how monotonous life would be. It hardly would be worth the living, you know.

MURDER MYSTERY IN DEATH

T. J. Walker of Waukegan Found Dead on Railroad Tracks

SAD TERMINATION OF VISIT

Dead Man Was Delivering Christmas Gifts and Mystery is Found in Finding Body on the Tracks

Between Seventeenth and Eighteenth streets, Friday morning near five o'clock, Motorman Frye and Conductor Cheskie of the Chicago and Milwaukee Electric Railroad Company picked up the mangled remains of T. J. Walker of Glen Rock and Park avenues, Waukegan, after having run over the body with the car.

Mystery is injected into the affair by the fact that the tracks were reported clear by the last car in at Highwood last night, while this morning Frye and Cheskie asserted that when they went to the remains they found them alone cold, indicating that death had taken place in some manner before the car had struck Walker.

Some even go so far as to assert that the dead man was first assaulted, perhaps even murdered, and then placed on the tracks to obliterate traces of the crime.

Mr. Walker, who is the millwright foreman at the Chicago Hardware Foundry Company in North Chicago left his home in Waukegan to bring presents to a brother-in-law, Mr. and Mrs. Little John, and family. This is all that is definitely known of his movements. His family, which consists of a wife and daughter, the latter Mrs. George Gehring, wife of the first chair barber in the ideal shop, naturally supposed that he would remain all night with the Little Johns and did not really worry until Friday morning when he failed to appear.

Then, instead of seeing him in the flesh, they received the sad tidings of death either by accident or foul play. Both are prostrated as is Mr. Gehring.

The identification was made when in the wreck of clothes the dead man wore Deputy Coroner Edward Conrad found a wooden in an ancient book telling his name and address.

A curious fact is that Thomas Victor, said to be a brother-in-law to the dead man helped gather his mangled remains but was unable to make identification. The features were obliterated completely and the body was so torn that identification would have been impossible had not the Woodman book been found. The late Mr. Walker was a member of North Chicago lodge and a worker.

The late Mr. Walker was 45 years old, had lived an industrious and saving life, was not at all a drinker beyond a glass of beer occasionally, and was respected by those who knew him.

Strong sentiment prevails today that Walker was not killed by the car but that he was placed on the track by someone who had first either killed him or fatally wounded him. The fact that motorman of the car believes so and old friends of Walker think the same, coupled to the fact that the police are hunting for evidence that shows such to be the case make this theory strong.

The verdict at the coroner's jury was that he came to his death by being struck by the car, the evidence showing that Walker was last seen on Eleventh street and was then presumably starting for home, could not trace him to the spot where he was run over by the car.

Whether Walker had any money on him or not is not known. His watch is at Yeoman's jewelry store for repairs.

The motorman stated that Walker was lying squarely across the track with his head placed directly on the rail. The motorman stated that he looked as though dead.

The Pallbearer's Ideal.

In the opinion of the average politician the ideal form of government would be one under which everybody could have a public office.

Annual Insurance Meeting

The annual meeting of the Millburn Mutual Insurance Company will be held in the lower room of Masonic hall at Millburn, Illinois, on Saturday, January 9th, 1909, at 10:30 A. M. to receive the official report of the company, to make any change in by laws that is necessary, for the election of all officers, and to attend to any other business that may come properly before the meeting. A full attendance is desired.

SYNOPSIS.

The Escapade opens, not in the romance preceding the marriage of Ellen Slocum, a Puritan miss, and Lord Carrington of England, but in their life after settling in England. The scene is placed, just following the revolution, in Carrington castle in England. The Carringtons, after a house party, engaged in a family tilt, caused by jealousy. The attentions of Lord Carrington to Lady Cecily and Lord Strathgaithe to Lady Carrington compelled the latter to vow that she would leave the castle. Preparing to flee, Lady Carrington and her chum Deborah, an American girl, met Lord Strathgaithe at two a. m., he agreeing to see them safely away. He attempted to take her to his castle, but she left him stunned in the road when the carriage met with an accident. She and Deborah then struck out for Portsmouth, where she intended to sail for America. Hearing news of Ellen's flight, Lord Carrington and Seton set out in pursuit. Seton rented a fast vessel and started in pursuit. Strathgaithe, bleeding from fall, dashed on to Portsmouth, for which Carrington, Ellen and Seton were also headed by different routes. Strathgaithe arrived in Portsmouth in advance of the others, finding that Ellen's ship had sailed before her. Strathgaithe and Carrington each hired a small yacht to pursue the wrong vessel, upon which each supposed Ellen had sailed. Seton overtook the fugitives near Portsmouth, but his craft ran aground, just as capture was imminent. Ellen won the chase by boarding American vessel and telling her pursuers Carrington and Strathgaithe, thrown together by former's wrecking of latter's vessel, engaged in an impromptu duel, neither being hurt. A war vessel, commanded by an admiral friend of Seton, then started out in pursuit of the women fugitives. Seton, confessing love to Deborah, "Flaming Britannia" overtook the fugitives during the night. The two women escaped by again taking to the sea in a small boat.

CHAPTER XVI.—Continued.

"Captain," began the lieutenant, "all the cabins but two are unlocked. We want the keys for those two."

"I haven't got no keys," answered the captain, curtly. "If they're locked—which two be they?"

"One is the after cabin on the port side; the other is, I take it, your own."

"My own ain't locked."

"I beg your pardon, I've just tried the door. You can go below and see for yourself. Perhaps you'd better bring us a light."

Captain Tuggles would have let them grope in the darkness forever had it not been for the complication of his own locked door.

A light was brought from the galley by the cabin boy and the three went below again. Captain Tuggles plunged to the door of his own cabin, turned the handle confidently. Sure enough it was locked.

"You see?" said Mr. Collier.

"I see, but I don't understand," said the captain. "Those two females went into this cabin. I showed them in there myself."

He pointed to the locked door.

"And that's locked, too. Now, captain, we are determined to get in those two cabins and we don't want to do any unnecessary damage to your ship. Have you a carpenter on board?"

"Yes," growled the captain.

"Then you'd better send for him, for if you don't, I shall be under the painful necessity of blowing open the locks."

The captain ran up the ladder and bade the second mate—both mates had been on deck during the episode—send the carpenter, aft with some tools for forcing locks. Presently a grizzled old veteran presented himself in the cabin and by Captain Tuggles' direction soon forced the lock of the after-cabin. Taking a lantern Seton went into the room which had been occupied by the young women. It was empty. Both bunks had been slept in, however, and on the floor lay Ellen's sword, belt and pistols where she had left them.

"They were here, that's certain," he said, turning to Mr. Collier.

"They've probably gone into the captain's cabin."

"What for, I wonder," growled the American.

"Well, soon see," returned Collier. "Have the carpenter open that door also."

After fumbling a few moments the carpenter forced open the last door. Again Seton entered, followed by the other two. There was no one there. The captain's eye was attracted by the open stern window. He started, opened his mouth to say something, thought better upon it and stopped. But there were two pairs of eyes in the cabin just as sharp as those of worthy Master Tuggles. One pair belonged to the sailor, Collier, too, noticed the open stern window and he at once pointed it out to Seton.

"I see it all now," he said. "Something must have alarmed them. They left their own cabin, looked it to keep us busy and give themselves time, came in here and went overboard through the stern window."

"Overboard into what?" cried Sir Charles in dismay. "You don't think they've committed suicide?"

Collier laughed. "Certainly not. Didn't you notice just before dark when we were overhauling the ship that she had a small boat trailing astern. It's pounds to pennies that they've gone in that. Here, wait, I'll find out."

He wriggled out of the window ladder, dropped down the Jacob's ladder and peered anxiously aft. There was no sign of a boat. It was dark and he couldn't see very well, but he could see enough to know that from whatever cause, the boat that had been dragging astern was gone.

"You've lost them again, Sir Charles," he said gloomily, as he climbed into the cabin again.

"I'll not believe it," cried Sir Charles bitterly disappointed at this unfortunate ending of so promising a venture.

Captain Tuggles laughed. It must be confessed that he hugely enjoyed the discomfiture of his unwelcome visitors.

"What's to be done now?" cried Sir Charles.

"Nothing but go back to the Britannia."

"What! without searching the ship?"

"Well, we can do that," returned Collier, "but I'm morally certain that it'll be of little use."

"Nevertheless," answered Sir Charles, "I should like it, for they may have been concealed elsewhere and this all may be a trick to throw us off the scent."

"All right," returned the naval officer, "I'll have a dozen of the Britannia out of the boat and we'll overhaul the Flying Star from stem to stern and from truck to keelson."

"Gentlemen," said the captain, "I'm terrible anxious to get ahead. I'll be honest with you this time. I did take in them two parties about noon to-day. I knowed that the one in men's clothes was a woman soon as I laid eyes on her, but she said she was the daughter of Captain William Penn Slocum of Philadelphia, a man I'd knowed for many years, and I agreed to take her to Bordeaux whither I'm bound. She said she was runnin' away from her husband. And the other girl was runnin' away from a lover. No, not exactly," continued the captain, correcting himself, "the other girl was

runnin' away 'cause she had to. I look it that she was no wise willin' to come with us but she couldn't help it. Sir Charles' heart leaped at this confirmation of his hopes and dreams.

"An' I give you my word," continued the captain, "that they ain't nowhere else in the ship. I was down here just before dark, thought I'd fetch them some supper, and they was both asleep, an' I didn't have the heart to wake 'em up. I think it's just as this gentleman says, somethin' must have alarmed them, maybe they heard your hall; their boat was draggin' astern, and they made off in her."

"I have no doubt that you are speaking the truth," answered Seton.

Captain Tuggles started violently.

"Nay," said the sailor, "I mean no offense at all, but you don't know Lady Ellen Carrington and it's quite possible that without your knowledge she's concealed herself in some other part of the ship."

"If I produce her will you take off your men and your ship and lemme go on?"

"Instantly," returned Seton.

"I wish I could do it," said the captain. "All I can do is to send my men to assist yours. Mr. Rayker," he called out to the mate, "have the ship searched. Put no hindrance in the way of these Brits, and if them two females can be found, fetch 'em aft, for God's sake!"

It did not take the sailors long to search the ship. They found no trace of Ellen and Deborah whatsoever and so reported to Collier.

"I am sorry for you, Sir Charles," said Collier, "but they have evidently escaped you. They're cruising around somewhere in these waters in that boat. Perhaps we can overhaul them at daybreak if we have good luck," he said. "At any rate, they are not here, and we'll have to return to the Britannia."

"My friend," said Sir Charles, gloomily, "we owe you some reparation for stopping you in this way. If this will compensate, I shall be glad."

He extended his hand with a gleam of gold pieces in it. Captain Tuggles took the money, examined it critically, walked to the side of the vessel and dropped it overboard.

"What do you mean by that?" cried Sir Charles, angrily.

"It's right that you should pay me for the trouble you've caused and the insult you've put upon me, but that

doesn't make it necessary for me to take your money."

"Why didn't you give it back then?" asked Collier, who was as much astonished as Seton.

"There wouldn't have been any pay if I'd give it back. It goes into the ocean, that'll clean it off. Now, if you're through with me, although I've enjoyed immensely this evening's conversation, p'raps you'll be kind enough to call off your men, take your ship out of my way and lemme go on."

Collier laughed.

"It was that sort of spirit," he said to Seton, "that prevented us from conquering them in the last seven years. Come on, we have naught to gain here. We'll let the American eagle scream undisturbed."

"Yes," said Captain Tuggles, "and it's this sort of spirit that's goin' to make it hot for you if you ever try to fight us again. The American eagle never goes to be any younger or weaker than it is now, and look at next time."

Seton laughed at the captain's assurance in which there was more truth than either of them dreamed, turned on his heel, followed Collier to the gangway, descended to the boat, which was shoved off and red to the Britannia.

A few moments later there was a shrilling of pipes, a hoarse yelling, a hurrying of feet along the decks of the liner. Her helm was shifted, her sails filled, her main yard swung, and she was swashing away in the night, an example that Captain Tuggles was quick to follow.

"Captain," said the good mate, whose watch it was, "I suppose them females is lying off her in the dark somewhere, p'raps if we stand on easy we can pick 'em up ain't."

"I wouldn't have it in my ship again," said Tuggles violently, "for a thousand pounds. Women are all right ashore, especially when men are at sea, but when they two gals together on a ship, God help 'em. An' so I says to Mrs. Tuggles, she can keep house in Boston, and I'll keep house on my quarter-deck. I ain't there, and I don't feel that way when I'm in her presence."

With which it of sea philosophy the worthy captain fades into the darkness and out of the pages of this history.

CHAPTER XVII.

The Preliminaries to Danger.

Admiral Knorr was waiting the return of the boat at the gangway of the Britannia. Great was his disappointment when he discovered that Seton and Collier were alone.

"Hey! What?" he exclaimed. "Where are the—?"

"I'll explain it in your cabin, if you'll permit, sir," answered Sir Charles, gravely, unable to hide his disappointment.

"Come aft, then," returned the admiral. "Collier, you, too, gentlemen," he continued as he waved them to seats in his spacious cabin, "what's the story? Did not the ladies board that ship?"

"They did, sir," answered Sir Charles.

"Well, why didn't you bring them on? Wouldn't they come with you? Couldn't you persuade them?"

"We couldn't persuade them because we didn't have a chance, sir," answered Collier.

"What do you mean?" exclaimed the admiral in bewilderment.

"They had gone!"

"Gone? Where?"

"I wish we knew," answered Sir Charles with a very melancholy air.

"But my dear Sir Charles, where could they have gone? Did you search the ship?"

"Every nook and corner in her, sir," answered Collier.

"But I don't understand," began the admiral.

"They must have seen us ranging alongside, sir," returned the lieutenant, "for when we broke into the cabin which they had occupied we found the berth had been used, but the ladies had fled."

"Fled where?"

"Into the captain's cabin."

"Did you not enter that?"

"We did, sir. They had left that."

"Left it for what?"

"For the small boat in which they had boarded the Flying Star, which, you remember, we noticed dragging astern of the merchantman while we chased her this afternoon."

(TO BE CONTINUED.)

RELIEF FOR THE UNFORTUNATE.

Where the United States is Behind European Countries.

The plan for establishing a state labor colony incidentally calls attention to the backwardness of the new world in two important matters, the relief of honest men out of employment and the suppression of vagrants. Save for the work done chiefly by private organizations, in a few large cities, there would be absolutely nothing in the United States which a Swiss, German or Dutch charity worker might compare to the labor colonies of his native land. Even a Frenchman, whose country is overrun by vagabonds, can point with pride to relief measures which have already done much to reduce the suffering due to the enforced continuous idleness of from 6.5 per cent to seven per cent of all workmen.

The idea of allotting small gardens to men out of work was conceived and put into practice by Gen. van den Bosch in Holland as far back as 1818; to-day more than 2,000 poor families are thus supported in the little kingdom. The environs of Paris are dotted with some 7,000 plots assigned by the Workmen's Garden Society to the unemployed, either gratis or at a nominal cost.

NEW TEACHING PLAN

EDUCATION INNOVATION BEING TRIED IN EAST.

Schoolroom and Factory Combined in First Experiment—High-School Boys Spend Alternate Weeks in Shops.

New York.—Advanced ground in industrial educational work has been taken in Fitchburg, Mass. Educators here are watching the development of the ambitious undertaking with more than passing interest, as upon the success or failure of the departure will depend whether or not the plan is adopted elsewhere. This fall the second-year high-school boys received the privilege of learning a metal trade by going into the factories of the town to work one week at regular factory hours and to return to the schoolroom the following week, thus alternating between factory and schoolroom throughout the year. Twenty boys were elected to take the new course, and the reports for the first three months of the experiment are altogether favorable, not one of the 20 boys having shown any desire to abandon the combination of schoolroom and factory work.

It is the first attempt of the kind in a public school. A course similar to this one has been in operation at the University of Cincinnati for older boys, and the Fitchburg experiment is patterned after the Cincinnati idea. The course is one of four years, the first year consisting exclusively of schoolroom work and the three following years of theoretical and practical training equally apportioned. The factory owners, seven of whom

are co-operating with the school department, say that the high-school boys are making better progress than the full-time apprentices, and Superintendent Joseph G. Edgerly of the Fitchburg public schools reports that the schoolroom work of these boys is fully up to the standard.

The success of the Fitchburg plan seems so well assured that steps are being taken in a number of other cities, whose school authorities have been in correspondence with Superintendent Edgerly, to begin similar courses next year. Superintendent Edgerly and Principal John G. Thompson of the Massachusetts State Normal school at Fitchburg, who has taken a deep interest in the working out of the plan, believe they have gone a long way toward solving the problem of how best to keep the boys in the high school for the full four years' course, a problem that has been the despair of educators in all manufacturing towns, such as is Fitchburg. The belief of many parents, whether right or wrong, that their boys, who must eventually find their way into the shops, were wasting time in school when they could be learning a trade has been the chief cause of the falling off in the enrollment of second and third-year high school classes.

Inability of parents to support their boys during the four years they were in the high school has also unquestionably been a big factor, but this has been eliminated in Fitchburg, as the boys who take the shop-work course will be able to earn enough to clothe themselves, and even pay board, without interference with their school work, since they receive regular apprentice wages for the actual time they work in the factories. The first year they receive ten cents an hour, and they work approximately 1,050 hours. Working the same number of hours the two following years, they receive 11 and 12½ cents an hour, respectively, and they are as well fitted for their trade as if they had put in all of their time in the factory—better fitted, because of a livelier intelligence and ability to use their hands as well as their heads, Superintendent Edgerly says.

The shopwork consists of instruction under practical overseers in the operation of lathes, planers, drilling machines, bench and floor work and such other machine work, according to the ability of the apprentice, as pertains to the particular branch of manufacture of the shop where the boy is employed. Of the 20 boys who entered the Fitchburg shops last August, 16 are learning the machinist's trade, two are receiving practical instruction in pattern making and two in drafting. The co-operative course includes English, mathematics, with tables and simple shop machines; mechanics, including simple machines; freehand and mechanical drawing.

Joseph G. Edgerly

How Uncle Sam Will Keep in Touch with His Warships.

his fleet, no matter in which of the seven seas they may be cruising. The corner-stone of this stupendous achievement will be laid when work is begun in the near future on a high-powered, long-distance wireless station in this city.

Necessity was the inspiration for the undertaking, naval experts say. The United States assumed the responsibility of patrolling the Pacific when the Philippines were taken under the fold of the Stars and Stripes. It is all very well, perhaps, for battleships to sail forth boldly on month-long cruises, but Uncle Sam wants to be in a position to call them up, day or night, and make them feel they are not so far away from home after all.

High-powered stations similar to the one soon to be constructed in Washington will be established along the Pacific coast. The next step will be stations in Hawaii, Guam, Samoa and the Philippines. Wireless communication with ships in the North Atlantic ocean is now possible to a satisfactory extent. With the future system installed the North Pacific, the greater portion of the South Pacific and part of the Indian ocean will be gathered up and figuratively spread out in view of the windows of the White House.

In times of peace the navy department will be able to guide the ships at all times with the certainty of a man moving the pieces on a chess board. Should war come the responsibilities of a naval engagement need not rest entirely on the shoulders of the men aboard the ships. In some rooms in the White House a board of naval experts may sit and flash wireless messages directing and advising the fleet in its fight.

It will be difficult to catch Uncle Sam napping when he has "string his lines" around the world. He can warn his sea fighters against traps into which otherwise they might fall while roaming the ocean without news of events. Admiral Cowles' plans, contained in his annual report, have aroused much enthusiasm among naval experts, who say that with the building of the proposed stations the all-world wireless system will be proved a practical undertaking.

BIRTHPLACE OF WEBSTER.

House in Which Daniel Was Born Still Standing.

Boston.—Persons who visit the city of Franklin, N. H., to see the birthplace of Daniel Webster are surprised to find that the house is not upon its original site, which is marked by a boulder appropriately inscribed.

The house in which Daniel was born is still standing, however, across the street. It has been changed, since it was moved to its first foundation, by being coated into the L part of another building. It is used for a shed.

One of the facts of interest at the birthplace is the magnificent elm tree which was a pride of Webster when

UNCLE SAM TO GUIDE WARSHIPS.

Plans for Extending Wireless Service Around World.

Washington.—Plans have been announced by Rear Admiral William S. Cowles, chief of the equipment bureau of the navy, which provide for the eventual establishing of wireless communication around the world. Some day—and Admiral Cowles is confident that the day is not far distant—Uncle Sam from his chair in the White House can direct the ships of

his fleet, no matter in which of the seven seas they may be cruising. The corner-stone of this stupendous achievement will be laid when work is begun in the near future on a high-powered, long-distance wireless station in this city.

Necessity was the inspiration for the undertaking, naval experts say. TOOK EDGE OFF THE EFFECT.

His Mistake When He Boasted of Charity.

Taylor got on the subject of charity one night at the Press club.

"Practically all acts of charity," he said, "are performed out of vanity. Only sort that counts, you know, is that—Recording Angel, eh? I remember once, motoring in the summer, came to a small town that had suffered from a flood. In the empty post office there was a contribution box for flood sufferers."

"Not a soul was present. Not a soul saw or knew me. I pushed a bill into the box and slipped away unseen. And that act, I claim, that act of charity, was worth more than these acts involving many thousands, which are made on public subscription lists, to the loud fanfare of trumpets."

Taylor paused and relighted his cigar. His companion said: "Quite right. Yours was genuine modest charity, Taylor. No word about it."—Detroit News-Tribune.

REAL GRIEVANCE.

Small Wallace accepted an invitation to a party, as follows: "Dear Louise—I will come to your party if it doesn't rain" (then thinking that he might have to stay home in that case)—"and if it does."—The Delineator.

GROOMING COUNTS.

But I cannot make a Fair Skin or a Close Coat.

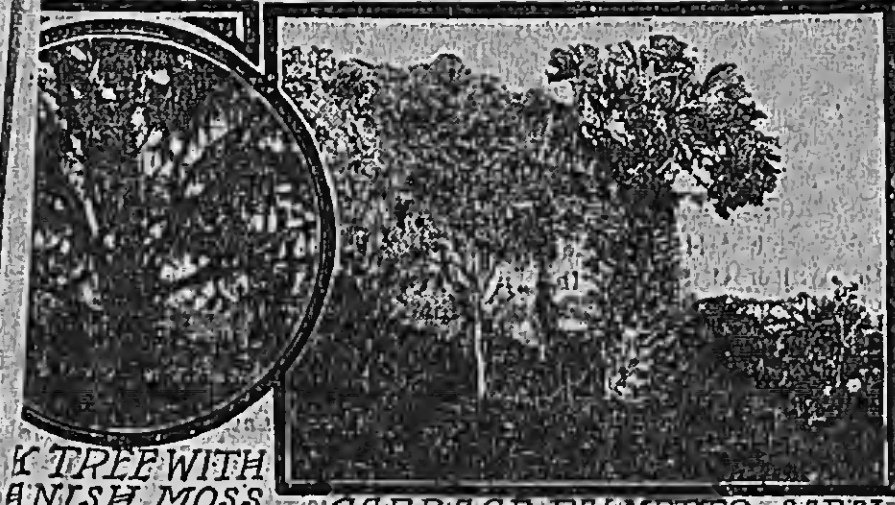

Women with good complexions cannot be homely. Creams, lotions, washes and powders cannot make a fair skin. Every horseman knows that the satin coat of his thoroughbred comes from "all-right" condition. Let the horse get "off his feed" and his coat turns dull. Caring, brushing and rubbing will give him a clean coat, but cannot produce the coveted smoothness and gloss of the horse's skin, which is his complexion. The ladies will see the point.

Lane's Family Medicine.

Is the best preparation for ladies who desire a gentle laxative medicine that will give the body perfect cleanliness internally and the wholesomeness that produces such skins as painters love to copy. At drugstore, 25c.

NATIONAL FOREST OR FLORIDA RESERVATION TO BE ESTABLISHED EAST OF THE MISSISSIPPI.

K. TREE WITH
SPANISH MOSS

CABBAGE PALMETTO, SABA-
PALMETTO,
BANK OF
KISSIMEE
RIVER

REPRODUCTION LONGLEAF PINE.

Florida goes the distinction of
the first national forest cre-
ated east of the Mississippi river.
President Roosevelt has just signed a
bill setting aside and nam-
ing Ocala national forest in Marion
county in eastern Florida and another
bill creating the Dakota na-
tional forest in Billings county, North
Dakota. Inasmuch as the first named
national forest is the first in North
America, the two proclamations add
more states to the list of
wherein land will be put under
federal administration. There
are 19 states, and Alaska, having
national forests.

Before the creation of the Ocala, in
Florida, the two forests in Arkansas,
Ozark and the Arkansas, were the
most national forests. Prac-
tically all the other national forests
in the Rocky mountain and the
west coast states. The Florida for-
est is about 201,480 acres, situated
about the fourth has been taken
from the land laws. It covers
between the St. John's and
rivers and at no point is
an exceeding 150 feet above
the sea. The area is by na-
ture fitted for the production of
all the other products of the
state. The area, however,
is particularly well adapted to the
production of the longleaf pine,
which is even
valuable as a fire
break. The longleaf
is more valuable com-
mercially than the sand pine, appears
only on this forest and is
especially to the lower flat
lands and the streams on the bor-
der of the forest.

On the pine and scrub
land cypress, cabbage palmetto,
gum, gradually changing
to ash, elm, magnolia, hick-
ory are found bordering
the ponds and lakes which
are abundant throughout
the forest.

played a very important
part in the present
condition of the Ocala,
for year after year have
happened over this tract
vegetation and consuming
of the soil. Naturally pro-
cesses which have not been
the names prove positively,
that the soil will rapidly re-
store itself and that
of fires would eventually
be a reforestation of practical
value.

All operations have been
on the area included in the
national forest. Turpentine
is carried on over contin-
ued and through the careless
methods used the fur-
top of the adjoining region
is jeopardized. The soil is of
for agricultural purposes
the only crop which can be
that will be of lasting value
and with proper care and
here should in time be a
rest of this species.

Dakota national forest con-
sists of 150 acres in the Bad Lands
is located in Billings coun-
ty an equal distance between
the Chicago, Milwaukee &
the south. Its creation is
or it means that an experi-
ment for forest planting has
been made in North Dakota, the
first state in the Union, hav-
ing a per cent. of tree growth.
The service expects to establish
the area may be refore-
sted. This feature
to prove a very good ob-
ject to the settlers, who, it is

hoped, will in turn plant windbreaks
around their farms.
The forest is very open and for the
most part contains a scattering stand
of western yellow pine timber. Along
the creek bed are found ash, box elder,
cottonwood, elm and birch. Cedar
breaks are also found on precipitous
slopes bordering the streams. West-
ern yellow pine is the only merchant-
able species, however, on the forest
and the average stand per acre is not
over 2,000 feet. The reproduction of
the forest is fairly good wherever mature
trees occur, but owing to the open
condition of the forest and the dense
growth of grass it is for the most part
unsatisfactory.

There is but little timber that will
be sold from the forest at the present
time, since this area is very isolated,
being surrounded on all sides by vast
plains. Many homesteaders have in
the past come to this forest for tim-
ber for logs to build their houses.
Since the completion of the Chicago,
Milwaukee & St. Paul railroad, Billings
county is rapidly being settled, and
while stock grazing is at the present
time the most important industry, it is
very probable that farming will be-
come the most important industry
within the next few years. It is very
important, therefore, that the timber
which now remains should be con-
served exclusively for the use of the
home builder.

At the present time there are but
seven homesteaders within the bound-
aries of the forest, but all of the odd
sections are denuded land being
owned by the Western Land Securities
Company. This company has been
selling portions of its holdings dur-
ing the past few years. Very little of
the government land within the
boundaries of the forest is suitable for
farming purposes, since it is quite
rough and broken and water is very
scarce. It is the country outside of
the forest which is now being taken
up by settlers.

No sawmill operations have ever
been conducted on the area. When
the Northern Pacific railroad was be-
ing built a large number of trees
were cut for railroad ties and together
with the logs which have been pro-
cured for house building by settlers,
this is the only use which has been
made of the timber of the forest. It is
understood that the logs used in the
construction of President Roosevelt's
cabin, which now sits in the state
capitol grounds at Bismarck, N. D.,
were obtained from the area now in-
cluded in the Dakota national forest.

Gov. Burke of North Dakota is very
much interested in the forest and
thinks it will be of innumerable value
to the people who live in the region
where the forest is located.

Both of the new national forests,
Ocala in Florida, and the Dakota, will
be put under administration by the
forest service as soon as possible.

One-Eyed Mosquito
Not a few Sarawak mosquitoes
would be worthy of notice as being
peculiar, but space forbids mention of
more than one, Oculomyia sarawaki.
Like the monster Cyclops, this
one-eyed mosquito is remarkable being
one-eyed. The insect was covered
a year or two ago by Dr. Bur, and
the curator of the museum at Washing-
ton considers that this specimen is
uncommon, as he has never seen an-
other. —London Standard.

FOND OF ATHLETICS

PRESIDENT HAS SET GOOD EX-
AMPLE FOR CABINET MEN.

His Fondness for Healthy and May
Sports Has Been Contagious
with Advisers—Wilson
Not a Sport.

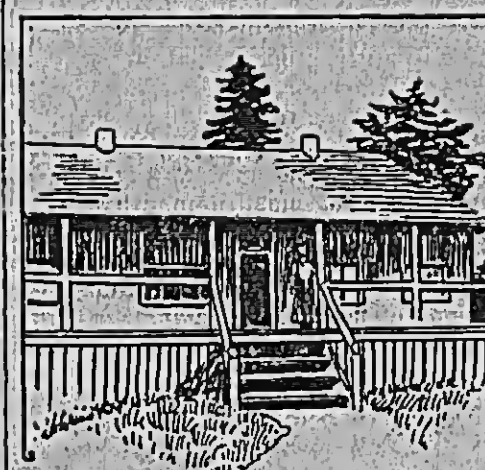

Washington.—Not the least good
that Theodore Roosevelt, as president
of the United States, has done his
countrymen has been to quicken by
precept and example their love and
appreciation of healthy, athletic and
manly sports. As a hunter, a horse-
man, a pedestrian, a tennis player, a
boxer, an exponent of jiu jitsu—in
short, a follower of every wholesome
form of exercise and manner of sport
—the president has set an example
that has been contagious and that will
bear good fruit for many a day to
come.

The eight serious and one jocund
gentlemen who stand at all times
ready, if not anxious, to lend their
counsel to the president regarding the
plotting of the ship of state are not
unlike him in respect to their fondness
for athletic recreation.

Secretary Straus, who has had con-
siderable experience in the service of
his country both at home and abroad,
and who is now at the head of the
many-sided department of commerce
and labor, is an ardent fisherman and
an enthusiastic pedestrian. He found
ample opportunity to gratify both his
fishing and walking propensities dur-
ing the past summer.

The entire month of August was
spent in the Maine woods, in company
with William Loeb, Jr., secretary to
the president. There, in a little cabin
of logs, which Secretary Straus asserts
cost him the munificent sum of \$450,
far from civilization and close to the
heart of nature, where the deer came
curiously up to investigate the in-
truders and the brook trout rose
graciously to the fly, a happy party en-
joyed to the full the unconventional
delights of a genuine outing. The
camp can be reached only after a con-
siderable tramp through the woods, at
that time in the full glory of their
richest foliage, so that on arrival at
the unostentatious but hospitable por-
tals the newcomers were in mood
to appreciate the dainties spread be-
fore them, dainties typical of the re-
gion and the environment.

The camp possesses every conven-
ience that the "simple life" requires,
and afforded ample accommodation not
only for Secretary Straus, Mrs.

Camp of Secretary Straus at Big
Island Pond, Me.

Straus and their young son, but also
for Secretary Loeb and several other
guests.

The most striking feature is the
central hall, with its stone chimney,
where on a wide open hearth spruce,
pine and maple logs blazed cheerily
and gave out needed warmth, especial-
ly in the mornings and evenings, while
in Washington people were seeking
the parks and house-tops to get refuge
from the humid heat.

"I feel that the head of this depart-
ment ought to know something about
fishing," said Secretary Straus, almost
naively, "as the bureau of fisheries is
under his jurisdiction, and in order to
learn about fishes you must love the
sport of taking them."

One would have to go far to find a
more ardent sportsman and outdoor
athlete than the postmaster general of
the United States, George von Len-
gerke Moyer of Hamilton, Mass. With
him athletic exercise is little short of
a religion, and with his 50 years sit-
ting lightly on him he can outride and
outwork most younger men. What he
goes through during his vacation
would kill any man whose nerves were
not in perfect trim, whose muscles
were not like whip cords and whose
digestion was not capable of assimilating
the heartiest viands.

But the postmaster general does not
try to crowd into a brief vacation all
the exercise and open-air recreation of
an entire year. Every day he jumps
on his horse at seven o'clock in the
morning and takes a ride at a rattling
pace over country roads and cross
country in the bracing morning air.
He is an accomplished and daring
horseman.

James Wilson, secretary of agricul-
ture, is no sport. When he wants recre-
ation he exchanges one kind of work
for another, and even when at home
in the bosom of his family he is not
wont to indulge in cards or checkers
or chess or any other of the games
commonly resorted to for recreation
and amusement.

Victor Howard Matcalf, the recent
secretary of the navy, is as fond of
sport as when at Yale he led his boat
crew to victory, but he now finds
recreation in other ways. Fishing,
hunting and mountain climbing formed
his chief amusements during his vaca-
tion last summer.

YOUNG RULER OF OLD CHINA.

Huautung Said to Be Unusual Child
for One of His Age.

London.—The accompanying picture
is made from a photograph represent-
ing as being the first authentic one of
Huautung, China's new emperor.
Huautung will not be three years old
until February 11 next, yet this por-
trait might readily be taken to be that
of a boy of ten or twelve.

The name Huautung, under which
the emperor will rule, signifies literally
"promulgating universally." It is

China's New Emperor.

regarded as an indication of the ap-
proaching proclamation of a Chinese
constitution.

The infant emperor is Pu Yi, a son
of Prince Chun, the next younger
brother of the late Emperor Kwangsu.
Kwangsu married a niece of the
dowager empress 20 years ago, but there
was never any issue from the union.
Princess Chun is regent.

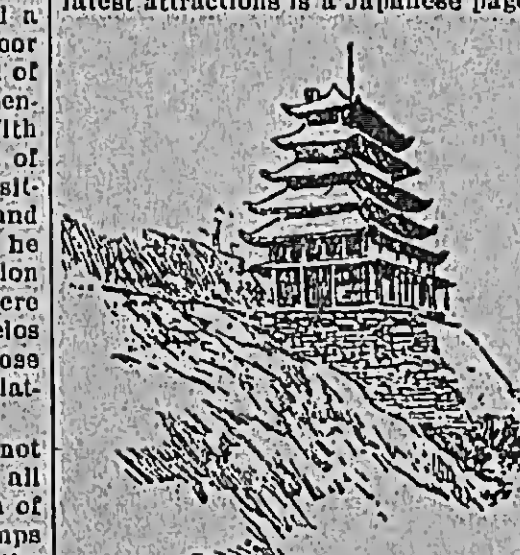

Pu Yi's coming to the throne is said
to be the beginning of the end of petti-
coat rule in China. The Dowager Em-
press Tzu Hsi died on November 15
last, on the day following the death of
Emperor Kwangsu. She had ruled
with an iron hand for half a century.
Pu Yi's stepmother, the Dowager Em-
press Yohanna, it is reported, has al-
ready been made to understand that
she would better keep her hands off
affairs of state, and has quietly with-
drawn into the background of the
court. The hordes of concubines who
were attached to the suite of Kwangsu
have been pensioned and told to take
themselves beyond the precincts of the
palace.

Pu Yi is described as a healthy lump
of a youngster, who seems to be un-
derstand but one thing that has happened
in the tremendous change which has
come in his life, and that is that he
has been separated from his old nurse.
He made the palace ring with his
howls for the first few nights after he
had been removed from the custody of
his family. Being the emperor, he was
of course privileged to cry as loudly
as he could and keep everybody else
awake. If one of the imperial nurses
were caught spanking him it would
no doubt mean that her head would
answer for it in the next hour.

JAPANESE PAGODA HIS HOME.

Unique Building 75 Feet High to Be
Occupied as a Residence.

Reading, Pa.—One of this city's
latest attractions is a Japanese pagoda.

Japanese Pagoda at Reading, Pa.

which graces the summit of Mount
Penny, overlooking the city. The pa-
goda, which is built of stone, with
Spanish tile curved balconies, was
erected by former Select Councilman
William Abbot Wiltman, who proposes
to occupy it as a private residence.

Mr. Wiltman admits he has never
been to Japan, and is too busy to go
for some years to come, but wishes to
live in a pagoda home. The home is
50 feet square at the base and is at
least 75 feet in height, and is sur-
mounted by a flagstaff and a sundial.

A New Kind.

"Pa, what is the deandy parallel?"
"I guess, son, it is somewhere about
the one where work in the tropics is
located." —Baltimore American.

ETHEL ROOSEVELT'S DEBUT

SHE MAKES HER BOW TO SO-
CIETY AT THE WHITE HOUSE.

President's Younger Daughter Is In-
troduced to the Fashionable World
at a Brilliant Ball.

Washington.—In the historic east
room of the White House, beautifully
decorated for the occasion, President
Roosevelt's youngest daughter, Ethel,
Monday night made her formal bow
to society.

Preceding the dancing in the east
room, which began at ten o'clock, Mrs.
Roosevelt and Miss Roosevelt received
the invited guests in the blue room.
Miss Roosevelt's gown was of soft
white satin trimmed with crystals,
while that of her mother was of dark
blue satin.

Seldom, if ever, has the east room
presented a more attractive picture.
Seated on a platform at the north end
of the room was the marine band-
orchestra, whose brilliant scarlet uni-

Miss Ethel Roosevelt.

forms against a background of green
formed a rich frame for the beautiful
color scheme lavishly painted in the
center of the room by the handsome
gowns of the fair debutantes present.
The invited guests numbered about
400, only unmarried members of the
younger set participating in the
dancing.

Theodore Roosevelt, Jr., who came
home from Connecticut to spend
Christmas with his parents, remained
over to attend the dance.

At midnight the music ceased and
the guests partook of a supper which
was served at small tables arranged
along the lower corridor and rooms
leading into this corridor.

Before the ball, Miss Roosevelt was
the guest of honor at a dinner given
by Assistant Secretary and Mrs. Bacon
at their residence. Covers were laid
for 60, the whole party going later to
the White House. Mrs. C. A. Muon
also entertained a large house party
which later went to the White House.

SIX ATHLETES SUSPENDED.

Prominent Men Are Accused by A. A.
U. of Professionalism.

New York.—At a meeting of the
registration committee of the Amateur
Athletic union Monday night six prom-
inent athletes were suspended. They
were: Mervyn W. Sheppard, Charles
Bacon, Harry F. Porter and George
V. Bonham of the Irish-American Ath-
letic club; F. G. Bellars, New York
Athletic club, and J. J. Lee, formerly
of the Boston Athletic association, but
now unattached.

The charge against the men was
professionalism, the allegations being
that they accepted or asked for ex-
orbitant expense money.

NINE KILLED IN COLLISION.

Freight and Work Trains Meet in
Montana, with Awful Results.

Great Falls, Mont.—As the result of
a collision between a freight train and
a work train on the Great Northern
late Monday afternoon, nine men are
dead and a number of others badly in-
jured.

The collision occurred at Mid-Canyon,
about forty miles south of Great
Falls, but details are lacking thus far.
The work train was carrying men en-
gaged on dredge work for the com-
pany, and with one exception all the
men killed were carpenters.

BECOMES "NO MAN'S LAND."

Valuable Strip Adjoining Fort Smith,
Ark., in Dispute.

Fort Smith, Ark.—By a decision of
the circuit court here Monday a strip
of land 12 miles long and two miles
wide and adjoining this city becomes
"no man's land." The strip was origi-
nally a part of the Indian land and
was allotted to the Choctaw nation,
but was ceded by congress to Arkan-
sas. The failure of Arkansas to ac-
cept the land by an amendment to its
constitution is given by the court as a
reason for its ruling, which holds that
the boundary line of 1880 is still in
effect. Oklahoma claims the strip.

Daring Burglars Get \$25,000.

New York.—A safe robbery which is
said by the police to be unexampled in
point of daring was revealed by Oscar
C. Jackie, a jeweler of 366 Third ave-
nue, whose place of business was en-
tered and looted of \$25,000 in cash and
\$20,000 in jewelry.

Tom Longboat Is Wedded.

Toronto, Ont.—Tom Longboat, the
Indian long-distance runner, was mar-
ried to Miss Loreta Maracle Monday
night at the Church of St. John the
Evangelist.

WHAT THE DOLLIES

Small Wonder That the Little
Was Really Alarmed.

Little Mary was really very
Mother said she was sure it was an
attack of appendicitis, but Grandma
was equally sure the little one was
threatened with convulsions.

The argument waxed warm in
Mary's presence, and appropriate reme-
dies were used, and the next day she
was better.

Coming into her mother's room dur-
ing her play she said:

"Mamma, two of my dollies are very
sick this morning."

"Indeed, dear, I am very sorry. What
is the matter with them?"

"Well I don't really know, mamma,
but I think Gwendolyn has a pint
of spiders' and Marguerite is going to
have convulsions."

INTOLERABLE ITCHING.

Fearful Eczema All Over Baby's Face
—Professional Treatment Failed.

A Perfect Cure by Cuticura.

"When my little girl was six months
old I noticed small red spots on her
right cheek. They grew so large that
I sent for the doctor but, instead of
helping the eruption, his ointment
seemed to make it worse. Then I
went to a second doctor who said it
was eczema. He also gave me an oint-
ment which did not help either. The
disease spread all over the face and
the eyes began to swell. The itching
grew intolerable and it was a terrible
sight to see. I consulted doctors for
months, but they were unable to cure
the baby. I paid out from \$20 to \$30
without relief. One evening I began
to use the Cuticura Remedies. The
next morning the baby's face was all
white instead of red. I continued until
the eczema entirely disappeared. Mrs.
P. E. Dumbin, Sheldon, Ia., July 13, '08."
Foster Drug & Chem. Corp., Sole Props., Boston.

JUST A TEST.

"Goodness, sonny, what's the
trouble?"

"Nawthin'. I just wanted to see if
I had forgotten how to cry—boo-hoo!"

Squeezing Him.

The Rev. Sam Jones greatly disliked
being interrupted when speaking, and
the rash auditor who attempted it
generally met with a pretty sharp re-
tor.

He was preaching on prosperity,
when a little man in the front row
shouted:

"Prosperity hain't hit me very hard
yet! Tell us about suthin' we know
about."

The speaker paused and glaring
down at the diminutive interrupter
squeezed him with the following:

"So prosperity hain't hit you yet, eh?
Well, you can't expect it to till you
grow some. It is pretty hard work to
hit nothing!"

Rug Industry Has Suffered.

Persia's rug industry has suffered
materially as a result of the closing
of the bazaars at Tabriz and other Per-
sian cities. The difficulties of trans-
portation on the highways of Persia
and the lessened American demand
for luxuries have contributed in no
small measure to the depressed con-
dition of the Persian rug trade. Prices
have fallen recently by one-third and
rug exports have fallen off by one-
half. Labor there now commands
only between five and ten cents a
day.

Beware of Ointments for Catarrh

that Contain Mercury.

Mercury will surely destroy the sense of smell
and completely derange the whole system when
entering it through the mucous surfaces. Such
articles should never be used except on prescrip-
tion from reputable physicians, as the damage they
will do is ten fold to the good you can possibly de-
rive from them. Hall's Catarrh Cure, manufactured
by F. J. Cheney & Co., Toledo, O., contains no mer-
cury, and is taken internally, acting directly upon
the blood and mucous surfaces of the system. In
buying Hall's Catarrh Cure be sure you get the
genuine. It is taken internally and made in Toledo,
Ohio, by F. J. Cheney & Co., Testimonials free.
Sold by Druggists, Price, 75c per bottle.
Send Hall's Family Pills for constipation.

Meteors Add to Earth's Weight.

The meteors which fall upon the
earth in vast numbers every year add
their weight to the earth. Thus the
earth is increasing a minute quantity
in weight each year, but not enough
to be perceptible in thousands
of years. Except for the escape of
light gases from the atmosphere there
is no known way in which the earth
can lose weight.

Chinese Idea of Government.

Here is a Chinese idea of prosperity
in a nation: When the sword is rusty,
the plow bright, the prisons empty, the
granaries full, the steps of the temple
worn down and those of the law courts
grass-grown, when doctors go afoot,
the bakers on horseback, and the men
of letters drive in their own car-
riages, then the empire is well gov-
erned.

Important to Mothers.

Examine carefully every bottle of
CASTORIA, a safe and sure remedy for
infants and children, and see that it

THE ANTIOCH NEWS.

ANTIOCH, ILLINOIS.

A REPUBLICAN NEWSPAPER.

PUBLISHED WEEKLY BY
A. B. JOHNSON, Editor and Proprietor

By Mail, One Dollar per Year, in Advance

Telephone, Antioch No. 402.

EDITORIAL NOTES.

The government has all plans made for evacuating Cuba again, beginning on New Year's Day. It will be the general wish of the American people this may prove to be the final evacuation, and that we may never again have occasion to send troops to this island.

The conference to conserve the resources of North America which has been called by President Roosevelt to meet in Washington, February 18th, will, if it serves no other purpose, enlighten Mexico and Canada as to the best way to avoid the mistakes of their more populous neighbor.

"Puck my box with five dozen liquor jugs" is said to be the shortest sentence containing all the letters of the alphabet. The Democrat and Chronicle found it in the columns of the Boston Globe, though there is reason to suspect that it originated in the "dry" belt south of Mason and Dixon's line.

Details of the earthquake disaster in Italy will be anxiously awaited by thousands of the natives of that country now on our soil, many of whom were born in the devastated region and may have friends or relatives concerning whose safety they will be in doubt until further news is available.

German manufacturers of souvenir post

cards report that the post-card craze is dying out in the United States. This will not be regarded as an unmixed evil by the long-suffering mail carrier, who has doubtless often wondered how it happened that post-cards were not included among the seven plagues of Egypt.

A fly has finally succeeded in performing a service for humanity by falling into a can of milk. The scene of the incident was Los Angeles and the circumstance that the fly died instantly aroused suspicions that the milk had been poisoned. An investigation followed and the suspicions were shown to be well founded.

Beginning the first of the year, public utility corporations in New York will be obliged to keep their books according to forms prescribed by the Public Service Commission, so that hereafter contributions to campaign funds cannot be charged to the repair account, or operating expenses entered under the head of permanent improvements.

Two members, at least, of the cabinet of President-elect Taft have been finally decided upon—Philander Knox, senator from Pennsylvania, as the head of the cabinet and Mr. Hendricks for Postmaster General. Mr. Knox is a wealthy man and owns a fine house in Washington. He can sustain the inevitable expenses of entertainment expected of the Minister of Foreign Affairs, for this is the relation which the portfolio of the Secretary of State involves. It is said that Representative Burton's reason for declining a cabinet position was because of the expensive social necessities attached to it. The salaries of cabinet officers have been recently raised to \$12,000 a year and this to many would seem ample to support a person of American tastes in Washington, where living is not necessarily high. But it is well known that wealth is a necessary accessory to high official position. A regime of millionaire senators has set the pace and the Rooseveltian era has been one of brilliant hospitality.

AUCTION SALE REAL ESTATE TRANSFERS

The undersigned will sell at public auction at the Wilson block, Antioch, Ill., on Tuesday, Jan. 5, at 1 o'clock, the following: All the hotel furniture, fixtures, stoves and ranges, dishes, beds, etc., 2 horses, one 5 years old and one 8 years old, 1 side seated bus, 1 2 seated bus wagon, 1 trap buggy, 1 mower, 1 rake, 1 stable plow, 1 harrow. All the above is nearly new and clean. Terms cash.
C. M. SPRING, Prop.
George Vogel, Auctioneer.

Lost Appetite.
A plant was found in India, a species of "vorarum," a small portulaca which was taken medicinally by a native of dyspepsia. His could neither eat nor drink without the greatest agony, yet he had to ride 30 miles a day in his avocation. After the second dose his stomach was renewed and his appetite returned. The plant is called "Indian's root." Let us have a bit of it. There are 7,000,000 souls in America who have no stomachs. They approach the breakfast table in fear and trembling, crying: "O my God, have I got to eat again!"—Y. Press.

Medicine That Is Medicine.
"I have suffered a good deal with malaria and stomach complaint, but I have now found a remedy that keeps me well, and that remedy is Electric Bitters; a medicine that is medicine for stomach and liver troubles, and for run-down conditions," says W. C. Kiestler, of Halliday, Ark. Electric Bitters purify and enrich the blood, tone up the nerves, impart vigor and energy to the weak. Your money will be refunded if it fails to help you. 50c at J. H. Swann's drug store.

The Amateur Gunner.
"Ma," asked the little rabbit, "is it true that pa was shot by an amateur gunner?" "Not at all!" snorted the mother rabbit scornfully. "The gunner was shooting at something else, while your poor father sat behind him and laughed. Unfortunately the gun kicked, and the man sat down on your father and killed him."

Prevention, the new Candy Cold Cure Tablets, are said by druggists to have four special specific advantages over all other remedies for a cold. First—They contain no Quinine, nothing harsh or sickening. Second—They give almost instant relief. Third—pleasant to the taste, like candy. Fourth—A large box—48 Proventives—at 25 cents. Also fine for feverish children. Sold by J. H. Swann.

Thoughts.
It is very important to cultivate businesslike habits. An omniscient friend of mine assured me not long ago that when he thought over the many cases he had known of men, even of good ability and high character, who had been unsuccessful in life, by far the most frequent cause of failure was that they were dilatory, unpunctual, unable to work cordially with others, obstinate in small things, and, in fact, what we call unbusinesslike.—Lord Avebury.

Why pay more—when you can get, not only 93 fine large cups of Dr. Shoop's Healthful Coffee from a 25c package—but a coupon on a 25c silvered "No-Drip" coffee strainer, besides? Look for the coupon, I put them in now. The satisfaction is, besides, most perfect. Sold by Williams Bros.

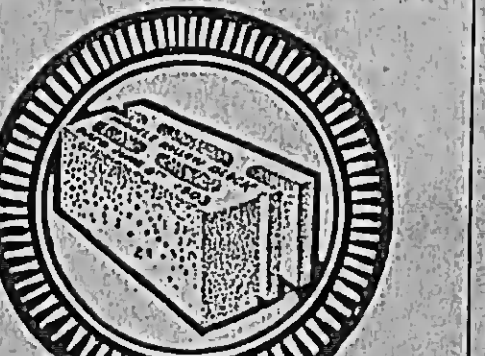

Disappearing Home Life.
The flat dweller ought not to keep a dog, prefers not to keep a cat, cannot have a garden, has no chance of keeping house, has no possible place for memories and, most emphatically of all, has no use or accommodation for babies. Although it may be possible to make homes without kitchens, or babies, or flowers, or memories, or cupboards, the spirit of home is hard to woo and win without any of them.—Fortnightly Review.

Miracle Concrete Blocks
Whether you are about to build a house, or a foundation only, or a silo, we want you to know about the celebrated Miracle Concrete Blocks, double air spaced, frost proof and economical. We want to submit a figure on the cost of the blocks ready to lay, and in the finished wall. A house, or any other building, built of Miracle Double Air Space Concrete Blocks is worth more than its cost.

SAVAGE & WATSON

The old fashioned way of dosing a weak stomach, or stimulating the heart or kidneys is all wrong. Dr. Shoop first pointed out this error. This is why his prescription—Dr. Shoop's Restorative—is directed entirely to the cause of these ailments—the weak inside or controlling nerves. It isn't so difficult, says Dr. Shoop, to strengthen a weak stomach, heart, or kidneys, if one goes at it correctly. Each inside organ has its controlling or inside nerve. When these nerves fall, then these inside organs must surely falter. These vital truths are lending druggists everywhere to dispense and recommend Dr. Shoop's Restorative. Test it a few days and see "Improvement" will promptly and surely follow. Sold by J. H. Swann.

Would Not Have It Lessened.
Dr. Walter O. Smith, the popular Scotch poet-preacher, on one occasion tried to explain to an old lady the meaning of the scriptural expression, "Take up thy bed and walk," by saying that the bed was simply a mat or rug easily taken up and carried away. "No, no," replied the lady. "I cannot believe that. The bed was a regular four-poster. There would be no miracle in walking away with a bit of mat or rug on your back."

Marked For Death
"Three years ago I was marked for death by a grave and cough was tearing at my throat. Doctors failed to help, and I was told I was marked for death. Dr. King's New Discovery," says C. Williams, of Bac, Ky. "The helped me and improved my health. I had gained 58 pounds in weight. My health was fully restored." This holds the world's healing record and cold and lungs and throat diseases prevent pneumonia. Sold under at J. H. Swann's drug store.

Their Marks.
"The seal or signet ring," says a jeweler, "once had a very high use. In the Middle Ages, a body but the priests could wear stamped documents with the rings, as the illiterate now make marks."
"The signet rings of noblemen," says the owner's crest or arms, "of merchants bore intricate gramo, trademark or the like. are certain old continental rings preserve in cabinets the seals worn by their founders—rings seals are inscribed with the marks still in use."
